

**AMENDMENTS TO THE SPECIFICATION**

Please amend the paragraph that begins on line 15 of page 19 as follows:

The damper rubber 14 includes a damper body 14d. The damper body 14d includes a first deforming portion 14b having a hole 14a and a second deforming portion 14c having no hole 14a. The hole 14a is reduced in cross-sectional area nearly perpendicular to a compressive load direction. Two such damper bodies 14d are interconnected by a connecting member 14h as one set, which set is inserted between projections 11b and 13b at plural positions, as shown in FIGS. 4 and 5.
